

Is shocking part of your waterline treatment plan?

Protect your lines from these common waterline pitfalls.

Protocol deviations from product IFU

Variability in source water quality

Stagnation of water in dental units

Citrisil™ Shock* delivers a concentrated dose of silver ions, killing odor causing bacteria, and reestablishing compliant dental water quality in your dental unit.

**Shocking waterlines on a monthly or quarterly basis adds an extra layer of confidence and security to your existing waterline treatment plan.*

CITRISIL™ SHOCK HIGHLIGHTS

- Kills preexisting odor causing bacteria
- Compatible with all Sterisil® products
(If you have a straw, leave it installed)
- Safe for your patients, staff, and equipment
- Will not dissolve mercury amalgam trapped in the amalgam separator
