waterline white paper:

Sterisil now offers comprehensive water testing solutions through your local dental dealers.

**Waterline treatment** is only one step in the recurring, multi-step cycle that helps ensure compliant bacterial content in your handpiece water when it matters most. If you don't test, how can you honestly say the **threat** was eliminated?

For over 20 years, Sterisil has been at the forefront of developing **compliance solutions** that mitigate the bacterial threat in dental unit waterlines. Today, Sterisil is proud to offer a complete line of dental water testing products that allow practices to accomplish the entire dental water compliance cycle with one manufacturer. That's the Sterisil advantage.

For more information contact your **Solmetex® sales representative or local dealer.**
